SOLAR SYSTEM

PLANET	ICON	DESCRIPTION
MERCURY		Mercury is the closest planet to the Sun and the smallest planet in our Solar System. It is rocky and has no moons.
VENUS		Venus is the second planet from the Sun. It is the hottest planet because of its thick, cloudy atmosphere.
EARTH		Earth is our home. It is the only planet known to have life, with air, water and land.
MARS		Mars is called the Red Planet because of its reddish color. It has two small moons: Phobos and Deimos.
JUPITER		Jupiter is the largest planet in our Solar System. It is a gas giant and has more than 90 moons!
SATURN		Saturn is famous for its beautiful rings. It is a gas giant and has over 140 moons.
URANUS		Uranus is an icy giant that spins on its side! It has a faint ring system and 27 known moons.
NEPTUNE		Neptune is the farthest planet from the Sun. It is very cold and has strong winds and 14 known moons.
